

Using hot water in the washer...

is like washing your money away!

Heating the water accounts for 80% to 90% of the energy used to wash clothes. Use cold water to wash and rinse your laundry.

Keep your dryer lint filter clean and have the exhaust duct cleaned annually.

If you can't set your washing machine for the size of the load, wait until you have a full load to wash.

Electricity is more valuable than ever.

Don't waste it.

Blue Ridge Electric Cooperative is committed to work with integrity and innovation to provide you with reliable power at the best possible price.

Visit www.blueridge.coop for more energy saving tips.
